Why Choose Stryker

One-piece aluminum transom

We are the first in the industry to create and design a structurally sound 1 piece transom. In contrast, many of our competitors use wood-wrapped transoms. A one piece aluminum transom has no chance of rotting or failure, creating a first class product.

Partnership with Scotty Fishing Products, preinstalled pads at the factory. We do this to allow you to plug and play up to 30 different fishing accessories on Stryker inflatable boats.

Preinstalled D-rings throughout our boat for tying off at the dock or adding accessories that can be tied down.

Military-grade peripheral lifeline for your safety.

We have added incredible value at the factory, allowing you to have a premium product without breaking the bank.

Why? If you decided to add these features after the fact, it would cost you an extra few thousand dollars; we want to make it a better investment, so we included these in our cost.

Extra material around the seating area and under the boat's hull for your added protection.

Sun shade bimini & bow bimini mounts preinstalled at the factory to allow these items to be readily used. In addition, all our HD and PROs come with a sunshade bimini in the box for added value.

Thermo welded seams, which means no glue = no chance of failure!

Stryker Shield on the bottom which is a 20cm wide strip of thick corrugated rubber for extra protection on LX & HD models. PRO & JET line offer the most protection as Stryker Shield is adhered to entire hull of vessel.

Why Choose An Inflatable Boat

Lightweight

Inflatable boats are often very light. This makes carrying them around easier, increases fuel efficiency, and helps them operate more efficiently. They are often so light that you can move them around yourself.

Fuel savers

It takes less energy to get around on an inflatable boat. So, in comparison to other vessels, they are go easy on fuel. Lowering fuel consumption helps you cut costs without compromising on performance. Not just that, you also get to do your bit to preserve the environment.

Stable

Their unique design makes it easy for you to navigate on water, even at high speeds. The buoyancy of the tubes, engine power, and advanced hull designs help you enjoy the water without worrying about stability. Inflatables have a low center of gravity and a buoyancy tube on each side. This makes them very stable. So, you can stand up and bask in the view without worrying about the boat flipping over.

Easy to maneuver

Inflatable boats are very responsive and easy to maneuver and navigate across any body of water. Thanks to their size and weight, they fit in small spaces and around other boats, making docking and side-tying easy.

Easy to store

An inflatable boat only takes up a little space. Most boats come with an included carry bag for storage. Put it in a bag and relax until it's time to get on the water. It's a perfect choice for people with less space to store their boats but who want to get out on the water as much as possible.

Versatile

They make the perfect companion for fishing, hunting, water sports, camping, diving, or as a dinghy/tender. They are designed for use in all types of water. For instance, their flat bottom allows them to perform in shallow waters like rivers, but the same boat is also safe to use elsewhere, such as the ocean. No matter what you enjoy, they allow you complete freedom of exploration while providing comfort.

Simple to use

Inflatable boats are easy to store, use and maintain. You can quickly get on and off the boat. Not just that, you can also get it up and running all by yourself. Unlike other vessels, one person can independently get things going. After use, just clean well and store. There's often no need for any complex maintenance practices.

Safe and comfortable

Safety is the utmost priority while boating. In contrast to popular myths, inflatable boats are very safe. Did you know? Inflatable boats are unsinkable! Being responsible on the water is always essential, but they make your job much easier by providing comfort while ensuring safety through design.

Cost-effective

There's a wide range of prices when buying inflatable boats. But, the cost of ownership is often low. You can have the best in the market at a reasonable price without compromising on a quality experience on the water.

Who Are We

Stryker Boats have been developed and tested by outdoors enthusiasts since 2007.

Our pursuit is to nurture a lifestyle for spending time connecting with nature whether alone or with friends and family. We live this passion everyday with our customers and employees.

Models

LX

Flagship series with more standard features than your average inflatable boat.

- Stryker Shield under tubes and keel
- 3 chambers in tubes plus keel
- 15" aluminum transom
- 5 scotty bases preinstalled
- Bimini mounts
- Bench seats
- Bow bag
- Seat cushion with detachable bag
- Boat carry bag & floor carry bag
- High pressure airmat or aluminum floor options available
- Sizes Available: 250cm to 420 cm (8' 2" to 13' 7")

HD

All the features of the LX plus 2 extra Scotty bases, 2 extra chambers in the tubes and a thicker 1.8mm PVC around bench seating area and under the entire belly of the vessel.

The HD also comes with EVA foam on aluminum floor boards and bench seats.

Added bonus: 2 bait caster rod holders with locking mounts & sunshade bimini with carry bag.

Sizes Available:
380cm to 470cm
(12' 5" to 15' 5")

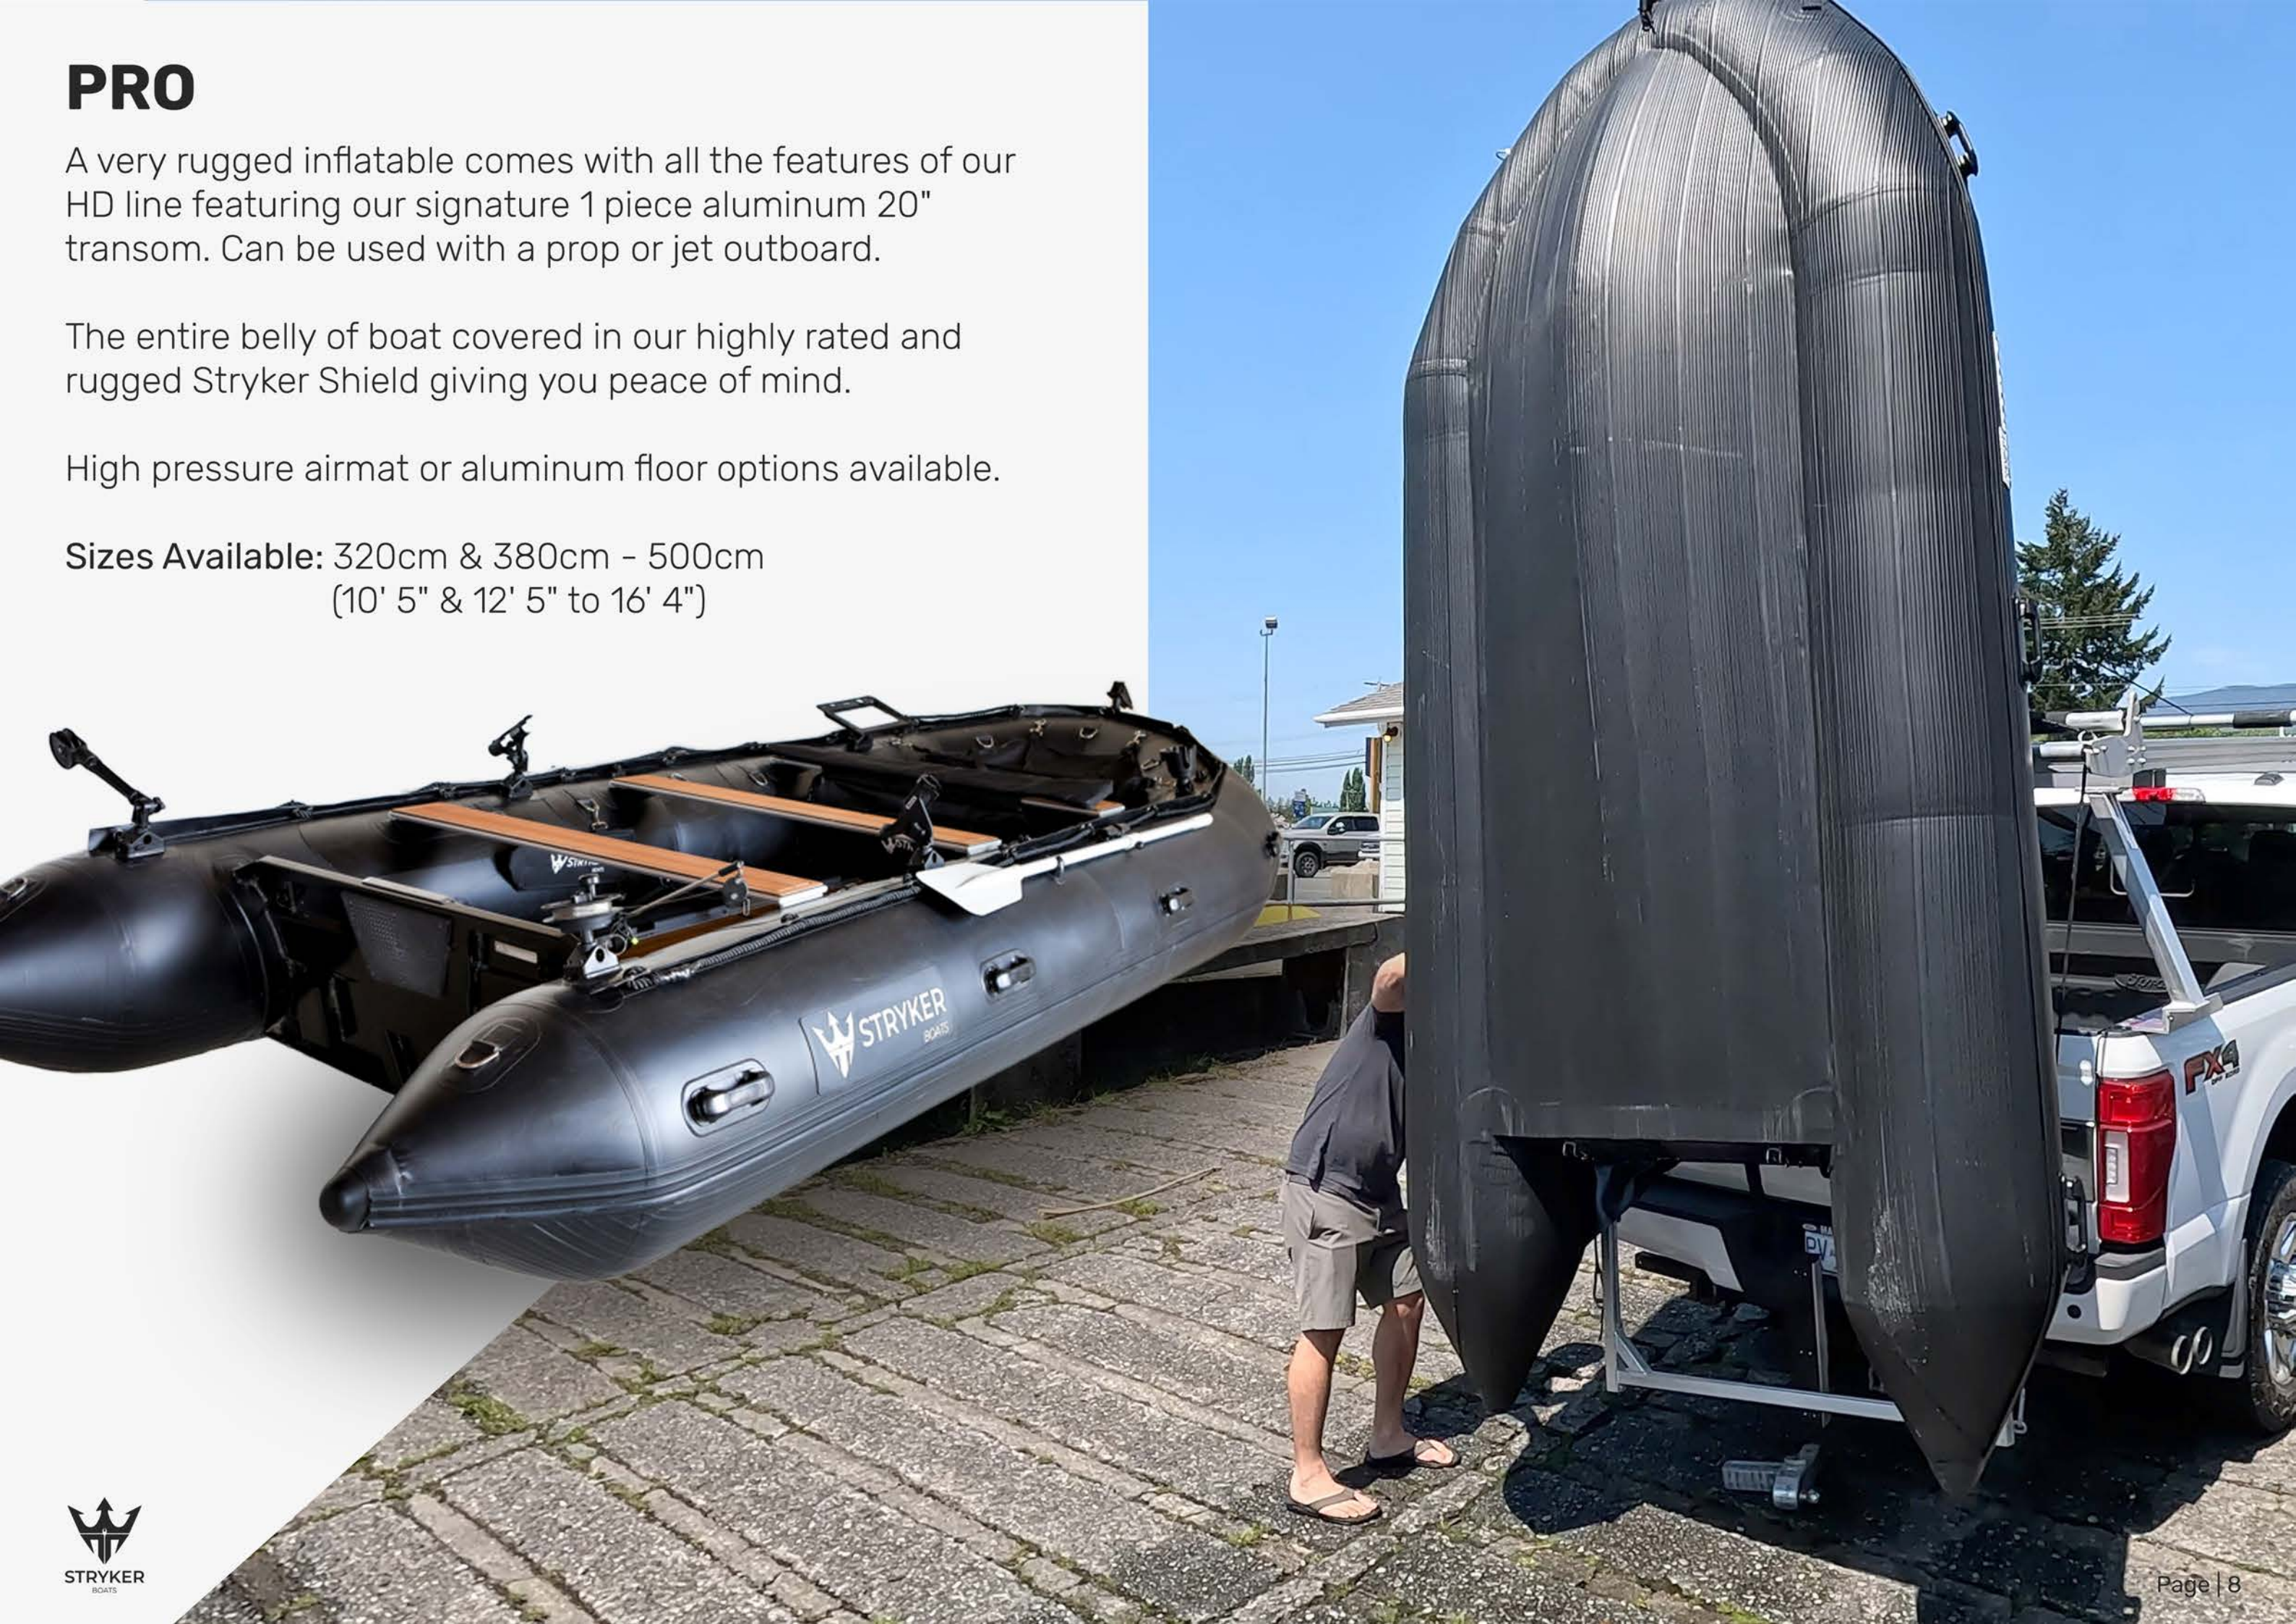

PRO

A very rugged inflatable comes with all the features of our HD line featuring our signature 1 piece aluminum 20" transom. Can be used with a prop or jet outboard.

The entire belly of boat covered in our highly rated and rugged Stryker Shield giving you peace of mind.

High pressure airmat or aluminum floor options available.

Sizes Available: 320cm & 380cm - 500cm
(10' 5" & 12' 5" to 16' 4")

JET

Perfect for running shallows is our inflatable JET that boasts a tunnel hull to provide extra protection for your jet foot.

Entire belly of boat covered in Stryker Shield.

Removable top tubes that add additional splash protection as well as giving passengers additional security by raising the edges of the boat.

Sizes Available: 420cm to 470cm (13' 7" to 15' 5")

JET ULTRA

All the features of our JET, with entire belly of boat covered in 1.5 mm American made Thermoplastic Polyurethane (TPU), instead of Stryker Shield, which allows the boat to slide over obstacles easier.

Sizes Available: 420cm to 470cm (13' 7" to 15' 5")

JET EXTREME

Take our JET ULTRA, but with 56 cm (22") tubes instead of 50 cm (20") tubes, which provides even greater flotation.

This allows the JET EXTREME to run extremely shallow, and helps with very heavy or unbalanced payloads.

Our most coveted inflatable shallow water boat.

Sizes Available: 420cm to 470cm (13' 7" to 15' 5")

RIB

Aluminum hull with inflatable tubes. Each RIB comes standard with a flat double deck aluminum floor.

15", 20" & 25" transoms available depending on the size of boat.

Run with either tiller or larger models are able to accommodate steering consoles.

Sizes Available: 230cm to 580cm (7' 6" to 19')

RIB JET

Our signature RIB series with the added tunnel hull. UMHW options available.

Sizes Available: 420cm to 520cm (13' 7" to 17')

RIB LX

Premium crafted yacht tender series with integrated bow locker, EVA foam on bow locker cover, bench seats & floor.

Available in PVC or Hypalon.

Sizes Available: 250cm to 360cm (8' 2" to 11' 7")

RIB LUX

Top of the line luxury RIB with console, a rear integrated padded seat and multiple access steps on this stunning vessel.

Sizes Available: 330cm to 580cm (10' 5" to 19')

Please contact us if you have any questions or need help selecting the right Inflatable boat accessories.

Trailers

Whether you choose a soft bottom or rigid hull, we have got you covered for a trailer. With options like swing tongues or spare tires we are ready to build a trailer to match your boat and outboard.

Outboards

Here at Stryker we like options. We are proud to offer outboards from Mercury, Suzuki & Tohatsu. Prop & jet options both available.

Custom Builds

Our team is ready to build the boat of your dreams. Whether you are looking for a package that you can roll up and transport in your vehicle, a large RIB with centre console steering or the most sought after inflatable jet boat bundle.

Boating and the outdoors is our passion and we can't wait to make waves with you.
